

Tiny Love®

# New Products 2025-2026

## Who We Are?

Tiny Love® is a global pioneer in creating developmental toys and products that encourage growth and inspire exploration. Working with a team of baby development experts, our designs are based on a proven developmental system that supports babies' skills at every age and stage.

Here at Tiny Love, we design products with both children and parents in mind. By closely following leading design and consumer trends, we design stylish collections that cater to different tastes, allowing parents to create beautiful play environments for their little ones without compromising on developmental value.

We are passionate about creating high-quality, fun products that encourage children and parents to explore together – because we love to explore too!

Safety is at the heart of everything we do. Our commitment to the highest safety standards is a shared responsibility across all departments and ensures that children have a safe experience with our products.

Since 1991, Tiny Love has been nurturing children's curiosity and natural sense of exploration. Since the launch of our Gymini - a playmat with activity arches that revolutionized playtime - we have been dedicated to finding new ways to support parents and babies on the magical journey of development.

In 2014, Tiny Love became part of Dorel Industries. Dorel Industries Inc. (TSX: DII.B, DII.A) is a global organization, operating two distinct businesses in juvenile products and home products. Dorel's strength lies in the diversity, innovation and quality of its products as well as the superiority of its brands. Dorel Juvenile's powerfully branded products include global brands Maxi-Cosi, Safety 1st and Tiny Love, complemented by regional brands such as Bebeconfort, Cosco, Mother's Choice and Infanti. Dorel Home, with its comprehensive e-commerce platform, markets a wide assortment of domestically produced and imported furniture. Dorel has annual sales of 1.4 billion US\$ and employs approximately 3,900 people in facilities located in twenty-two countries worldwide.

## Born to Explore

The moment we're born, we begin exploring the world around us: Who are these people? What are those lights? Is that mom?

It's our innate desire as human beings.

From there on, it's a lifelong journey of exploration. It may take a baby to the edge of the room or a scientist to the edge of the world; it will make new moms or dads plunge into hours of parenting exploration like an explorer in search of a lost culture. The same energy that makes us climb to reach the cookie jar is the one that makes us build rocket ships and reach for the stars.

We are inspired by the world we live in, by people around us, and by nature and its tiny miracles – parents and babies alike. Here at Tiny Love, we are especially inspired by babies and their relentless desire to explore, grow and learn. This is the inspiration that drives us all to make your baby's journey to the next milestone that much more exciting and meaningful.

**Tiny Love: We're all Born to Explore!**

# Tiny Skills®

Tiny Love's proven developmental system focuses on 6 essential skills.

Created with love and care by our child development experts, the system supports babies' journey of exploration, and encourages parents to explore with their little ones.

**We focus on 6 skills that are most important for a baby and toddler's development during the first years of their lives:**

## Senses

Our senses allow us to receive information about the world around us and to perceive it from a sensory point of view.

## Motor Skills

Our ability to control large and small muscles (legs, hands, fingers and more) to move our own bodies and the objects around us.

## Cognition

The mental process through which babies, children, and grownups learn, understand, remember and acquire knowledge.

## Emotions

The ability to identify, understand, and categorize emotions, helping babies better understand themselves and those around them.

## Communication

Communication allows babies and adults to connect and share thoughts and feelings. Over time, communication changes and evolves.

## Creativity

Creativity is how we turn our imagination into a reality. It helps babies grow into people who can invent, improvise, and think creatively.

## Available for Orders

Our new collections presented are already in stores and just waiting for you to order them!

Discover the magic and beauty of each and every one of them.

## Tiny Creations Collection

Create loving memories with Tiny Creations, a collection of **dermatologically tested**, DIY kits for creating keepsakes of babies' tiny hand and footprints. Includes everything you need to capture those special moments of wonder and turn them into precious lifelong memories.

## Tiny Rockers Collection

Music, one of life's greatest joys, plays a vital role in the development of children's bodies, hearts and minds. Our new Tiny Rockers Collection was inspired by all things rock 'n' roll, a musical genre that perfectly captures the vibrant, energetic, and occasionally rebellious spirit of little people.
